Education

Hacettepe University, Ankara, Türkiye
B.S, Computer Science, July 2022 - Current
GPA: 3.51 / 4
Başkent High School, Adana, Türkiye
July 2018 - June 2022

Projects

Resume Website

- Made with **React**
- Featured with dynamic elements, continuing to be updated with the latest developments, enhancements, and improvements.

Hacettepe Weather Website

- Made with **NextJS**
- Leveraged weather APIs to fetch real-time and forecasted data for Hacettepe's location. Ensured students and visitors had instant access to accurate weather information.

Personality Classification With KNN Algorithm

- Made with **Python**
- Classification model was built using KNN algorithm, Deep Learning, and NLP techniques. Success was achieved with an accuracy of over 98% using the responses of over 60000 people.

Tetris - Blockfall

- Made with **C++**
- Utilized core game mechanics like piece movement, collision detection, and scoring system. Implemented a graphical user interface (GUI) for visual representation of the game board and pieces.

DuckHunt

- Made with **Java**
- Developed a Duckhunt clone in JavaFX, focusing on object-oriented programming and UI design. Utilized JavaFX for animations, input, and scoring. Enhanced skills in game development and event-driven programming.

Extracurricular Activities

Inzva Winter Camp Participant, Istanbul, Türkiye

January 2024

Developed problem-solving and algorithmic skills in Algorithm Winter Camp (Intermediate Group).

English Instructor, Secret Business Academy, Baku, Azerbaijan

July - August 2023

Led impactful English training for leadership and intercultural skills, mentoring diverse talents for confidence and communication.
