## Computer Engineer

A highly proficient computer engineer, whose native language is Turkish and has an upper-intermediate level of English, possesses extensive experience in software development. With an in-depth grasp of programming languages, I take great pleasure in attending programming and technology conferences to remain up-to-date with the latest advancements and to expand my business network.

## Education

### Bachelor's Degree - Computer Engineering

Since July 2022 [Hacettepe University](#) Ankara, AN, Turkey

### High School

From July 2018 to June 2022 [Başkent High School](#) Adana, AA, Turkey

### Programme Completion Certificate

From July 2013 to June 2022 [Science and Art Center](#) Adana, AA, Turkey

## Voluntary experience

### English Instructor

From July 2023 to August 2023

[AIESEC, Secret Business Academy](#) Baku, Azerbaijan

From July 4th to August 16th, 2023, I spearheaded a Baku, Azerbaijan project that fostered intercultural interactions and honed leadership skills in participants. The English-based training I developed significantly impacted personal development across project management, leadership, and strategic thinking. I actively mentored diverse individuals, resulting in measurable improvements in their confidence and communication skills. Immersed in Baku's vibrant culture, I built deep connections and gained invaluable cultural insights, further enriching the project experience.

## Projects

- [React Resume Site](#): My CV site showcases my technical expertise and creative approach. Explore interactive elements, browse my code repositories, and gain insight into my digital world.
- [Hacettepe Weather App](#): Location-based weather data was successfully fetched and displayed through interactive charts and forecasts.
- [Personality Classification With KNN Algorithm](#): The personality classification model was built using the KNN algorithm, Deep Learning, and Natural Language Processing techniques. It utilises people's responses to personality tests.
- [LSB-Steganography Decoder and Encoder](#): Using LSB steganography principles, developed an encoder and decoder to raise awareness of privacy and potential security threats.

## Assets

**Programming languages: Python, Java, C++, Javascript**

**Developed and launched personal projects that demonstrate your skills and creativity**

**Passionate about continuous learning and staying up-to-date with the latest technologies and trends in the software development field**

**Ability to work independently and as part of a team**

**Ability to prioritize tasks and meet deadlines consistently**

**Strong communication and interpersonal skills**
